

Instruction manual

Commander

The HB Commander is a wired remote control for all hazebase machines with 5-pin remote control inputs. A new digital communication with the fogger offers the possibility to adjust the fog quantity as well as the reading of the fogger readiness.

The controls are appropriately sized so that operation with gloves is possible.

First connect the Commander to a suitable fogger.

Make sure to use a 5-wire connection

The mode on the fog machine must now be changed to Remote. Please follow the operating instructions for your fog generator.

The Commander is then automatically recognized by the fog generator. The fogging readiness of the fogger can be read from the LED. If it is green, fogging is possible. If the LED is red, the fog machine is still heating up.

When fogging is ready, the fogging process can now be started by briefly pressing the button. The quantity is determined by the position of the rotary knob. To end the fogging process, briefly press the button again.

Furthermore, you can also keep the button pressed. In this mode, the fogging process is stopped again when the button is released.

During the fogging process, the LED lights up orange.

The rotary knob has a detent position at 50%. This gives the user a feeling for the set quantity, even if he cannot see the machine directly.

Warranty conditions

hazebase provides warranty for the purchased Commander remote control according to the following conditions:

1. We shall remedy free of charge in accordance with the following conditions (Nos. 2 to 6) damage or defects to the device which are demonstrably due to factory defects if they are reported to us immediately after discovery and within 24 months after delivery to the end user. A warranty obligation is not triggered by minor deviations from the nominal condition which are insignificant for the value and usability of the device, by damage from the effects of water and generally from abnormal environmental conditions or force majeure.
2. The warranty service is provided in such a way that defective parts are repaired free of charge or replaced by faultless parts at our discretion. Devices for which a warranty claim is made with reference to this warranty must be handed over to us and sent free of charge. The proof of purchase with the date of purchase and/or delivery must be presented. Replaced parts become our property.
3. The warranty claim expires if repairs or interventions are carried out by persons who are not authorized by us to do so or if our devices are equipped with supplementary or accessory parts that are not matched to our devices. Furthermore, the warranty claim expires if a fog fluid other than the original hazebase fog fluid was used. If the devices are sent to us without prior removal or emptying of the fluid canister, the warranty also expires, as well as in the case of demonstrable disregard of the operating instructions or in the case of faults due to improper handling/handling as well as in the case of damage due to the effects of violence.

4. We do not grant any claims for performance on components or component groups that are subject to natural wear or normal wear. In particular, all fluid-conveying parts such as pumps and heating elements are considered to be wearing parts. A goodwill settlement will be checked in the individual case.
5. Warranty services do not cause an extension of the warranty period, nor do they start a new warranty period. The warranty period for installed spare parts ends with the warranty period for the entire device.
6. If a damage or defect cannot be remedied by us, or if the remedy is refused or unreasonably delayed by us, within 6 months from the date of purchase/delivery, at the request of the end user either
 - a. replacement delivered free of charge or
 - b. the reduced value is remunerated or
 - c. take back the device for a refund of the purchase price, but not more than the market price.
7. Further or other claims, in particular those for compensation for damage occurring outside the device, are excluded - unless liability is mandatory by law.
